KEY DELIVERABLES

What You See In Week One

- Live automation walkthrough tailored to your operations stack.
- Metrics dashboard preview highlighting time-to-value and accuracy.
- Founder-to-founder roadmap outlining launch milestones and risks.

WHY THIS MATTERS

Every pitch comes with working software, not wireframes. You get clarity on impact, effort, and the first automation win before we ever send a proposal.

WHY TEAMS SWITCH TO NEXAWORKS

Big Consultancies Are Slow. You're Losing Time & Money.

Traditional vendors burn your runway with decks and discovery. NexaWorks ships working software while others are still staffing the project.

METRIC

TRADITIONAL VENDORS

NEXAWORKS

Time to MVP	12-16 weeks	2-4 weeks
Time to Full Solution	20 weeks	5-12 weeks
Cost Model	Hourly / Headcount (Expensive)	Outcome-based (Risk-Shared)
Decision-Making	Slow, Layers of Approval	Fast, Founder-Led
Proven Results	Upfront Roadmap, Not Demo	Working Product, Live Demo

LIVE PRODUCT DEMOS

Proven Track Record

Live products, not promises.

RESUMIND
AI-
ANALYZER

Analyze 1000s of resumes in minutes

95% parsing accuracy, 150 concurrent uploads

CASE STUDY HIGHLIGHTS

Results That Compound

Three real-world builds where NexaWorks shipped measurable business outcomes.

RESUMIND

Manual resume screening couldn't keep up with surge in enterprise hiring requests.

95% accuracy

85% manual effort reduction

4.2s per resume

NexaWorks delivered an AI analyzer that auto-classifies talent pipelines, shortening recruiter response times from days to hours while improving candidate quality.

REPORTS PLATFORM

Leadership teams lacked timely analytics due to hand-built spreadsheets and manual QA.

98.5% success rate

90% automation

2.4s per report

We orchestrated full-stack automations that generate hundreds of exec-ready reports daily, unlocking faster decision cycles without expanding headcount.

ANALYTIC DASHBOARD

Operations leadership could not see real-time performance across distributed facilities.

8 weeks deployment

90% satisfaction

Real-time visibility

Our team shipped a unified dashboard in half the industry timeline, giving stakeholders instant alerts and scenario forecasting from a single control center.

HOW WE DELIVER OUTCOMES

We Don't Build Solutions. We Build Products.

Every engagement is treated like an in-house product launch—fast iteration cycles, force-multiplying AI, and founder-level ownership.

SPEED

5x Faster Delivery

Most vendors take 20 weeks for production-ready software. We compact that timeline to 5, shipping validated MVPs in weeks so you can test with real customers before doubling down.

Example

Talent marketplace launched in 5 weeks, unlocking paid pilot hires while competitors were still scoping.

[Learn More →](#)

PRACTICAL AI

AI That Works, Not AI That Talks

We embed NLP, ML, and automation exactly where it moves the needle. No buzzwords, no fragile demos—just dependable intelligence that scales.

Example

Resume analyzer hit 95% parsing accuracy, processing thousands of submissions in minutes without manual QA.

ACCOUNTABILITY

Direct Access, Direct Results

You work with founders who own outcomes. No sales layers, just senior engineers guiding every sprint and unblocking decisions with you.

Example

"They shipped in 8 weeks what our last vendor couldn't in 6 months." — Fortune 100 Talent Lead

CUSTOMER TESTIMONIALS

What Our Customers Say

Sarah Johnson

SJ Marketing Manager,
ResuMind

"NexaWorks turned a backlog of resumes into actionable insights within weeks. Our talent team finally has a system that keeps up with demand."

AC

Anonymous CTO

E-commerce Company

"They ship production-ready software faster than any internal squad we have. The automation freed up two full teams to focus on roadmap work."

Michael Chen

MC Software Engineer,
ResuMind

"Working with NexaWorks felt like adding senior engineers overnight. They solved edge cases we had battled for months."

INDUSTRIES

We Work Across Industries. One Problem at a Time.

We don't specialize in one industry. We specialize in solving ONE operational problem across industries—and solving it well.
